

Mission

Our mission is to create a supportive and inclusive network that improves the quality and range of daytime services and activities for people with a learning disability across Wales.

Aims

This network has 3 aims:

1. Enhance collaboration

Foster strong partnerships among organisations to share best practices and resources.

2. Improve services

Encourage the continuous improvement of the quality and range of daytime services and activities.

3. Increase agency

Stand up for the rights of people with a learning disability to have choice and control over day services and activities they take part in.

We believe:

- Everybody with a learning disability who has an identified need for daytime support has the right to access appropriate daytime services and activities.
- Everybody with a learning disability who takes part in daytime activities and services has a right to choice and control about their participation.
- Daytime services and activities are not for life. People with a learning disability must be given opportunities to progress and we should be ambitious about people's futures.

Values

This network is based on these values:

1. Collaboration

We value collaboration and partnership, recognising that together we can achieve more.

2. Innovation

We embrace innovation and new ways of working in providing day services and activities.

3. Inclusion

The network will be an inclusive environment where contributors are treated with dignity and respect.

4. Empowerment

We are committed to empowering people with a learning disability to achieve their full potential.
